Agile, Kanban, Scrum, line
management

Education

MPhys(Hons) Physics with
Astrophysics (2.1)
University of Sussex
4 A-levels A-C
10 GCSE A-C

Qualifications

Prince2 Practitioner	2016
MCPD Web (.net 4)	2012
MCPD EAD (.net 3.5)	2012
MCTS (.net 3.5 + 4)	2012
MCPD EAD (.net 2)	2010

Profile

I'm looking for a varied role where I can thrive as a capable and accomplished hands-on technical lead and grow my architecture expertise. I offer experience in a range of industries (particularly Financial) and a track record of proven delivery successes whilst working under pressure.

I enjoy working with teams to produce strong, timely solutions for business needs and have achieved this in my previous roles by promoting a culture of excellent engineering fundamentals and the adoption of Agile principles and establishing good measures for quality and progress to prove success.

Recent Experience

08/2018 - Present Team Leader, Engineering

Trade IX Ltd, Kettering

Delivered PoC to Prod transition within a timeline
Improved distributed transaction throughput by over 300%
Designed and implemented architectural changes to enable HA and high scale, global deployments
Led the Core Engineering XF Team and mentored across engineering team (>30 Devs)
Defined and implemented development and operational safeguards and standards

07/2016 - 08/2018 Lead Developer

easyJet Ltd, Luton

Led implementation for Seating Microservice rewrite
Architected key mechanics and contracts
Improved code quality to zero issues
Defined and implemented multi-branch CI/CD (TeamCity) for internal customers
Architected and led implementation PoC for new Digital platform

08/2014 - 07/2016 Senior Developer

Spreadex Ltd, St. Albans

Designed and delivered real time mobile trading platform using Redis and SignalR
Championed componentised architecture and microservice deployments
Identified and addressed security issues with the frontend

04/2009 - 07/2014 Technical Lead

Freestyle Interactive Ltd, Leamington Spa

Designed and delivered complex B2B integrations
Championed automated CI/CD and virtual dev environments using vSphere
Led face to face client meetings to discover requirements and present demos of progress
